Plants have been used for treating illnesses since primitive times. Paintings in the tombs of the pharaohs show that plants were being used by the Ancient Egyptians for medicinal purposes. Today, some modern drugs are still based on natural herbs. Aspirin, for example, is based on the bark of the willow tree.

Natural remedies are attracting increasing attention all over the world. The advantage of herbal medicine is that the whole of the plant can be used: the powerful substance in the plant cures the illness while the contents of the rest of the plant may help to prevent any harmful side effects. In this way, herbal medicines may be safer than chemical ones. Garlic is just one herb that has been used throughout the world as a cure for diseases as it is used to treat hair problems. Similarly, henna, which is known to be good for the hair, can also be used in the treatment of cancer.

If you pay a visit to a herbalist shop in Cairo, you will be struck by the different colours and smells. There are jars full of tree barks, roots, powders, oils and spices. The customer enters the shop and explains his symptoms to the herbalist, who will take notes, study medical reports and check his reference books before writing out a prescription.

Advertising has become very specialised in modern times. In the business world of today, supply is usually greater than demand. There is great competition between the different manufactures of the same kind of product to persuade customers to buy their own particular make. They always have to remind the customer of the name and the quality of their product. They do this by advertising. The manufacturer advertises in newspapers and on posters. He sometimes pays for songs to be sung about his product on commercial radio programmes. He employs attractive sales girls to distribute samples of it. He organises competitions with prizes for the winners. He often advertises on the screens of local cinemas. Most important of all is on television. He has advertisements put into the programmes whenever this is possible. Manufacturers often spend large sums of money on advertisements.

We buy a particular product because we think that it is the best. We usually think so because the advertisements say so. Some people never pause to ask themselves if the advertisements are telling the truth.

Many researchers, engineers and environmentalists are expressing deep concern about changes in the overall climate of the planet. Fossil fuels are being continuously used to produce electricity. The burning of these fuels produces gases like carbon dioxide, methane and nitrous oxides which lead to global warming. Desertification is also leading to warmer temperatures. The hazard of global warming is continuously causing major damage to the earth's environment. Most people are still unaware of global warming and don't consider it a big problem in the years to come. What most people don't understand is that global warming is currently happening and we are already experiencing some of its withering effects. It severely affects ecosystems and disturbs the ecological balance, therefore some solutions must be devised.

Alternative energy sources: solar, wind, hydro, geothermal, biomass need to be seriously pursued. Finding and using renewable sources is one of the methods to combat the ever-increasing global warming effectively since the continuous rise in the temperature of the planet is really upsetting. When sunlight reaches the earth 30% of the earth's sunlight is sent back into space, while the remaining is absorbed by oceans air and land. This heats up the surface of the planet. It is caused by anthropogenic activities.

Bullying can take a variety of forms, from the verbal-being called hurtful names – to the physical-being kicked – as well as indirect forms, such as being excluded from social groups. A survey I conducted with Irene Whitney found that in British primary schools up to a quarter of pupils reported experience of bullying, which is about one in ten cases was persistent. There was less bullying in secondary schools, with about one in twenty-five suffering persistent bullying, but these cases may be particularly rebellious.

Bullying is clearly unpleasant and can make the child experiencing it feel unworthy and depressed. In extreme cases, it can even lead to suicide, though this is thankfully rare. Victimized pupils are more likely to experience difficulties with interpersonal relationships as adults, while children who persistently bully are more likely to grow up to be physically violent and convicted of anti-social offences.

Until recently, not much was known about the topic, and little help was available to teachers to deal with bullying. Perhaps, as a result, schools would often deny the problem. "There is no bullying at this school" has been a common refrain, almost certainly all true. Fortunately, more schools are now saying: There is not much bullying here, but when **it** occurs we have a clear for dealing with it.

"Necessity is the mother of invention" is a famous common proverb which means that our needs always motivate our minds to create new things in order to manage well with a world full of speed changes.

Man's needs have often directed him to discover the natural resources around him, and to make with his own hands the things he wants.

Thus, he made tools to cultivate the land and get its crops. Those tools played an important part in establishing civilisation. Food, clothing and shelter are still considered to be man's basic needs. The progress of technology has enabled man to satisfy all these needs. It has helped him to take wide steps in developing agriculture, industry and public services.

Thus, we are now enjoying the blessing of modern civilisation. When civilisation developed and man lived in organised societies, he found himself in need of more than his necessities; Education is next to food in importance because it is the only way to acquire experience and the qualifications necessary to earn a living.

Education changed our style of living and led to higher thinking levels. He invaded space. He invented the computer. No wonder that man has great abilities which will enable him to create more inventions in the future.

It was just before bedtime. Sally was reading a hair-raising ghost story. She loved the excitement of scaring herself before a good night's sleep. She was reading the story halfway when she suddenly heard the squeaky opening of her front door. She was surprised by the scary sound. She felt something was wrong. Sally gently pushed the warm blanket aside and slowly crept out of her bed. She walked down the stairs. Even her very own footsteps on the creaky stairs scared her. She heard the soft sound of footsteps in the kitchen and she stopped to listen. It was surely a ghost from the past since everyone she knew was in their beds fast asleep at this hour.

The darkness also frightened her, but she wanted to find out what was making the strange noise. She turned to enter the kitchen where the noise seemed to be coming. Suddenly, she walked right into a dark figure. The dark figure stretched out a hand and quickly turned on the bright kitchen lights. It was Sally's elder brother Ken! He couldn't help laughing at poor Sally. He had gone out late that night with his friends and had just returned home. Sally felt silly to have thought it was a ghost. She had a good laugh too.

Dangerous substances discharged by factories cause **toxic** or poisonous air pollution. The emissions have serious effects on public health. Needless to say, exposure to high levels of these toxic emissions will cause a lot of human suffering through chest ailments and diseases.

Toxic chemicals, which do not break down easily in the atmosphere have been known to travel great distances and come down to earth. Moreover, pollutants emitted from automobiles, cars and other means of transport and dry cleaners are considered very dangerous. In this way, a huge quantity of cancer-causing chemicals are released into the air.

Benzene is known to cause leukemia in humans. This is a serious problem which is serious to human health. The World Health Organisation "W.H.O." reaffirms that the gap of the ozone layer has been widening. Two thirds of the layer that protects the globe have been completely destroyed. Ozone absorbs the harmful ultraviolet rays that cause skin cancer and damage eyesight.

Many countries are now taking action to reduce pollution. But this pollution problem may solve itself when the world oil wells have run out. Then we hope that alternative sources of energy will have been found.

Read the following passage, then answer the questions:

Octopuses are extremely intelligent. They have even learnt a few tricks to get them out of sticky situations. For example, they are afraid of a predator. As octopuses don't have teeth or sharp claws to defend themselves, they hide in the sand on the bottom of the ocean floor. Do you want to know how they do that? Well, the octopus is like a chameleon because it can change the colour of its skin to match the sand. This colour change happens in less than a minute.

Some octopuses like to stay in more shallow water where there are rocks and coral. However, octopuses can squeeze themselves into small spaces between the rocks to get out of reach of predators. Another way an octopus can hide is by shooting ink. An octopus uses a part of its body called a siphon to shoot ink into the water. The ink forms a cloud that hides the octopus. It's like a magician doing a vanishing act.

If an octopus is being attacked, it can actually make itself look like a venomous sea snake. It will bury itself in the sand, keeping two arms visible. It will change the colour of those arms to match a sea snake.

If an octopus is in trouble, it can break off one of its arms. The arm will then change colours and squirm around the water to distract the predator while the octopus swims away to safety. Don't worry though. The octopus's arm will grow back.

Choose the correct answer from a, b, c or d:

- 17 When an octopus is in a sticky situation, that means it's
 a) easy b) dangerous
 c) covered in stick d) unable to move
- 18 The octopus and the chameleon are similar as both
 a) swim in the same way b) eat the same food

Dear Mr. Reda,

I hope everything is Ok with you. Yesterday, I **had a night party with my friends**, so I had to stay up very late. **Let me tell you that the party was amazing.** We had **lots of fun there**. The food **was tasty and fresh**; those people **are excellent at hosting guests**. However, I don't like fish at all; they should have asked me what to eat. Never mind! **The video games were up-to-date** and I **beat them all**. My friend's father loves sports, so we enjoyed playing tennis table and volleyball. But **let me tell you that all of them liked my outfit**. They laughed out loud once they saw me with **my fascinating orange shoes, red trousers and checked-colourful shirt**. Ahmad and Amgad threw **tissues at me**. I am always **fashionable** as you know. At the end of the day, we had many pictures **which you can find in the attachments below**. I couldn't find any transportation, so I **requested a ride**. It cost **only half the price of my sunglasses** which **costs 150 pounds**. When I got home I realised that I had forgotten my wallet at my friend's, but my mum solved the problem and the driver was understanding. Anyway, I'm writing to inform you that I will not show up today because I haven't done any task yet and I'm tired a little bit because of the dancing. See you soon, my manager.

Best regards,

Anas
